

Benefits of an EMR Anti-Radiation Protection Strip

USEFUL ELECTRICAL PRODUCTS MAY NOT BE IDEAL FOR OUR HEALTH

No doubt, mobile phone, computers, air-conditioner, household gadgets, microwave ovens and so many other user friendly electronics which we use have become a part of our daily life. However, these are the same gadgets that are affecting the health of our families and us. The unseen radiation slowly kills our body cells and causes many severe health issues such as cancer, fatigue, and others.

A small, convenient and powerful EMR protection strip which helps everyone to have a healthier life can be applied on the electronics around us. An EMR protective strip is a powerful defender against harmful electromagnetism. Therefore, with the habit of applying it on every electrical device that surrounds you, one will be able to enjoy a better quality of life.

The Positive Effects of Scalar Energy EMR protective devices:

- Reduces Radiation from Electronics Applied Objects
- Enhance Sports Performance
- Help Recover from Sports Fatigue
- Increase Blood Circulation
- Help to Relax Tense Muscles
- Normalize Physiological Functions
- Improve Concentration and Focus
- Enhance Body Facility of Oxygen
- Strengthen the Body's Immune System
- Reduces Stress
- Improves Body Energy
- Relaxes Migraine and Headache
- Lowers Blood Pressure
- Enables a good night sleep
- Relieves Persistent Neck and Shoulder Aching
- Reduces Back Pain.
- Reduces Sweat and Odors.
- The list goes on

KEEP A DISTANCE AWAY FROM ELECTRICAL DEVICES

The bedroom is a place where we get to enjoy a quality rest and recharge our body energy after an exhausting day at work. Hence, do move all electrical appliances at least 6 feet from your bed to minimize the radiation around you.

Hand phone - Apply an EMR protective strip to the battery to extend the lifespan as well as to reduce the radiation output.

Laptop - Apply an EMR protective strip to the battery as well as another one at the laptop screen to reduce radiation and glare.

Television - Apply 2 EMR protective strips to any part of the board behind the screen.

Fridge - Apply 2 EMR protective strips to the side of the fridge as well as another 1

inside the fridge to encourage a fresher air flow.

Lamp - Apply an EMR protective strip on any part of the lamp near the bulb.

Forced air circulator - Apply 2 EMR protective strips near the side of the air duct to improve fresh air flow.

Mp4 Player and small gadgets - Apply an EMR protective strip at the part near the battery to extend battery life and reduce radiation output.

Microwave Oven/Grill - Apply 2 EMR protective strips to the back of the oven to minimize radiation and electricity usage.
